(54) COLLUNARIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To prevent the decrease in the content of a terpenoid contained in a terpenoid-containing collunarium charged in a spray container.

SOLUTION: A terpenoid-containing collunarium charged in a spray container whose inner wall surface brought into contact with the nasal drop on its charging is formed from a material comprising an epoxy resin, a polyamideimide resin or a fluororesin. The terpenoid-containing collunarium charged in the container can be preserved without accompanying the remarkable decrease in the content of the terpenoid.

LEGAL STATUS

[Date of request for examination] 24.10.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
